## CONNECTING TO PROJECTOR USING THE iPROJECTION APP

## 1. How to set up iProjection:

0

- Click on the **Windows icon** lower in the left corner.
- Click on EPSON projector folder.
- Click on Epson iProjection
- If prompted to select connection mode, select Advanced Connection Mode.
  - Click in the box to Set the selected Connection Mode as default.
    - DO NOT choose Quick Connection Mode.
    - Click on **OK** to set the connection mode.

|---|--------|
| Select Connection Mode.   |        |
| When connecting wirelessly, make sure you select the connection<br>specified in the [Network] menu.<br>(This is set to [Quick Connection Mode] by default.) | n mode |
| O Quick Connection Mode   |        |
| Advanced Connection Mode  |        |
| Connect to the projector using a wireless LAN access point or v<br>LAN.   | vired  |
| Set the selected Connection Mode as the default mode for fu<br>connections.<br>(Do not display this window again.)  | ture   |
| OK Cancel   |        |

- Turn on the projector with the remote.
- Press the LAN button on the remote.
  - The projected image should show the IP address, name and keyword.
- In the iProjection App select the projector from the list that matches the name and IP address shown on the projection screen.
