

ADHD EVALUATION AND TESTING

ADHD evaluation and testing at the Wellness Center requires multiple appointments.

STEP 01

If ADHD testing is desired, contact the Wellness Center to establish a counseling appointment with one of our providers. You can review provider biographies on our website prior to making your appointment.

STEP 02

Your counselor will go over your current symptoms, relationships, educational history, substance use, family history, etc. during the initial assessment. Additional appointments will be scheduled with the same provider where you will engage in continued assessment.

STEP 03

If ADHD diagnostic criteria is met, your counselor will make appropriate recommendations for ADHD testing. A referral will be sent to the clinic physician if medication is part of your desired plan of care. A nurse from the clinic will call to inform you of next steps.

Continuing care information:

If ADHD testing has been completed outside of our clinic and you would like to continue your care here, evaluation and testing records should be sent to us (fax: (660)-562-1585) to be reviewed by our physician. Once reviewed, clinic staff will reach out to discuss scheduling and next steps.
